THIS IS

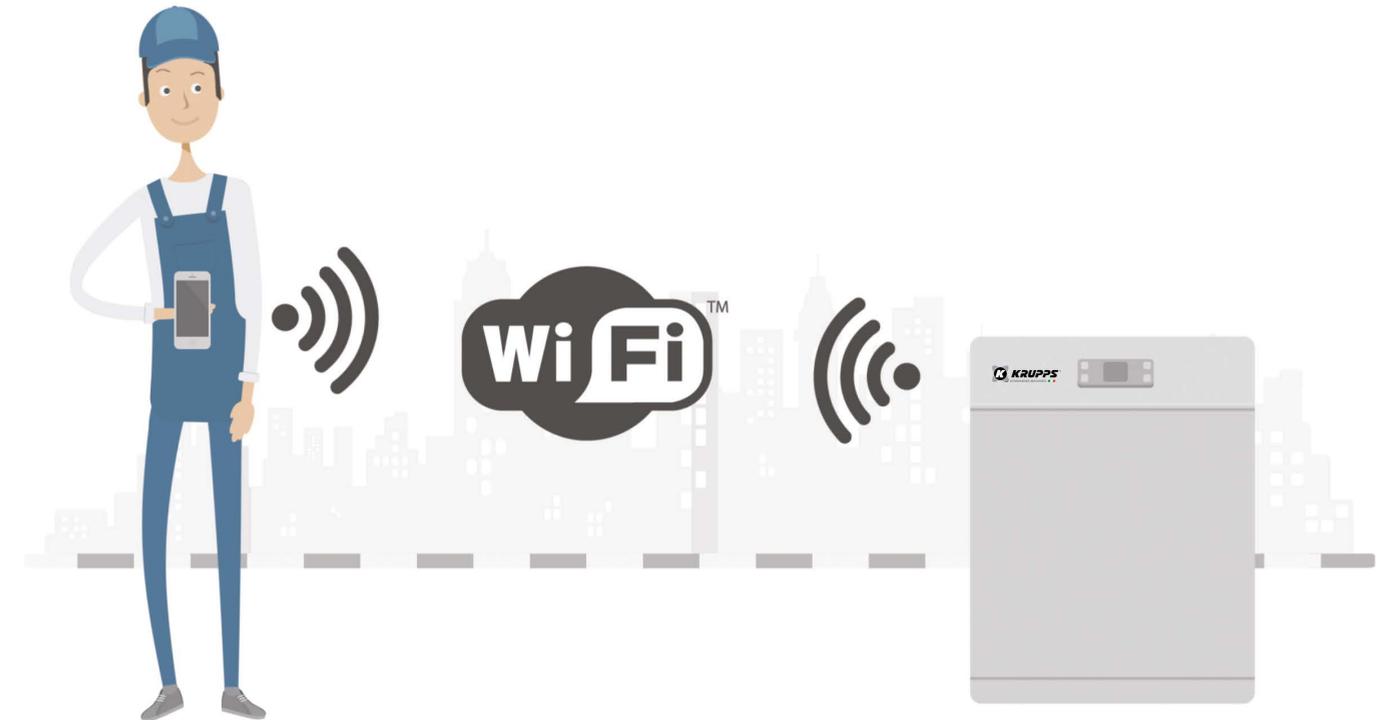

by Krupps

01

YOU CAN'T QUIT USING IT

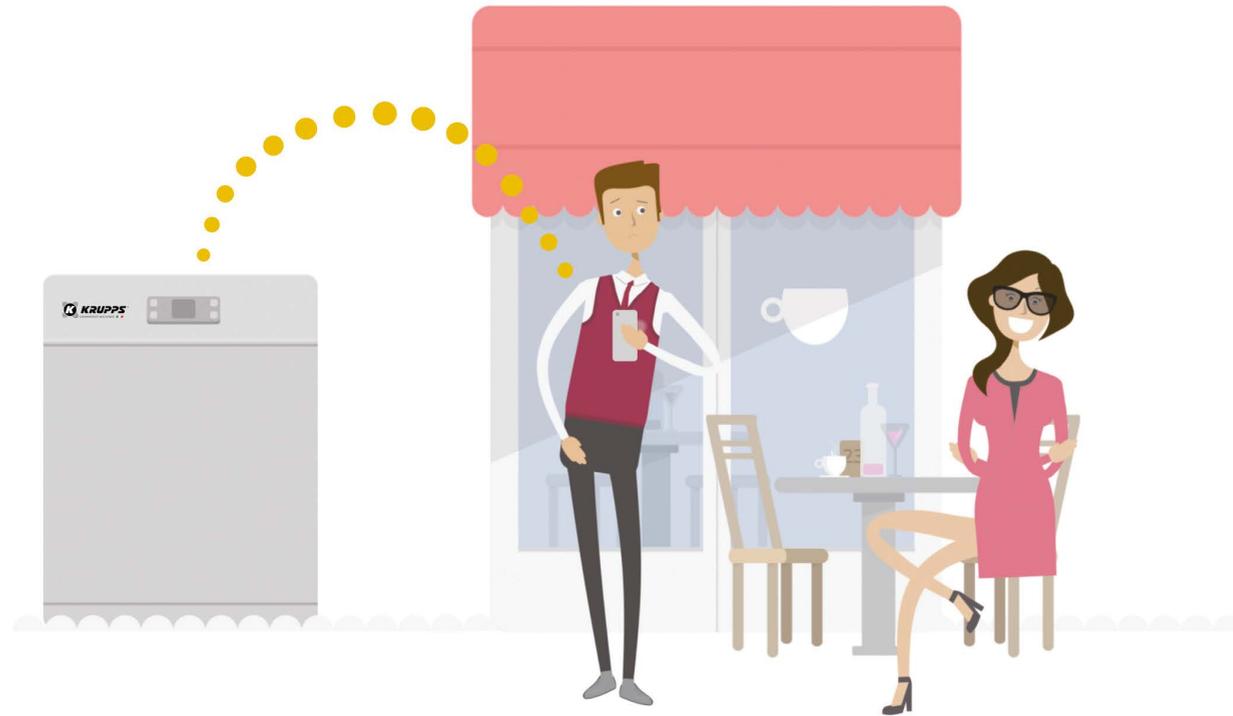

iKloud is the first Wi-Fi control system for professional dishwashers. Get yourself involved in the Krupps' world: we became essential for everybody, from the restaurant owners up to dealers or engineers.

02

WITH KRUPPS THE SOLUTION AT YOUR FINGERTIPS

The innovative **iKloud** system gives the availability to easily control the dishwasher by distance through your smartphone, in order to give you always an incredible support. Have you ever forgot your dishwasher switched on uselessly? With **iKloud** you can switch it off and on remotely cutting therefore its consumptions or set its daily working hours, in this way the machine will be ready to work as soon as you will open your place.

03

DISHWASHER AND ENGINEER IN CONSTANT COMMUNICATION

Thanks to **iKloud** also the engineer could control the machine's status, having the availability to improve its performances and offering a matchless service. It will be the machine itself to send a message to the engineer as soon as it recognises an anomaly and certain intervention will be done directly through his mobile.

GRANTED EFFICIENCY
BETTER SERVICE
HIGH PERFORMANCES } MORE SAVINGS

04

EVEN MORE PRACTICAL MAINTENANCE

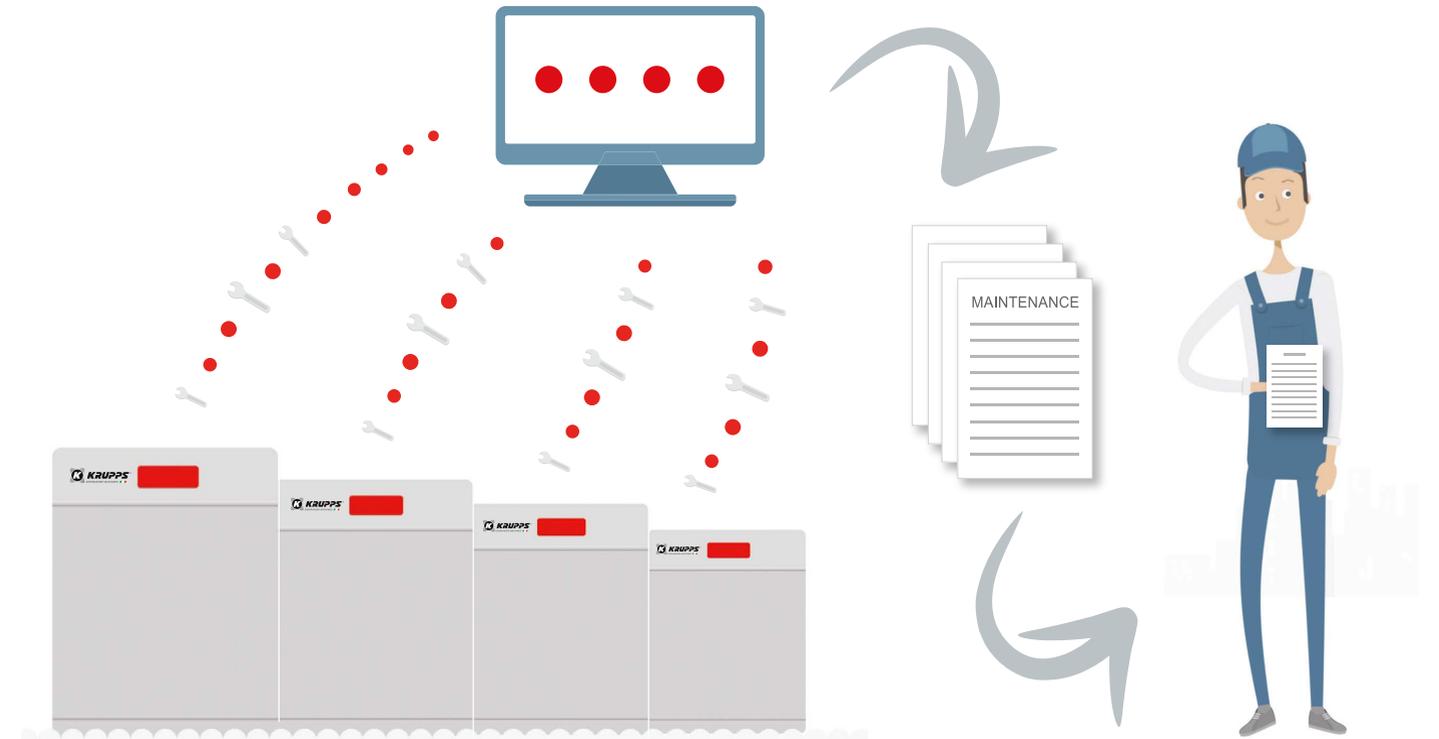

With Krupps also the maintenance becomes easier thanks to the instant notification system. The sent message not only describes the irregularity, but it also advises about its source and its possible solutions. If necessary the engineer will attend the end user knowing in advance the situation and so quickly replacing the needed spare part.

05

MANAGE EASILY YOUR INTERVENTIONS

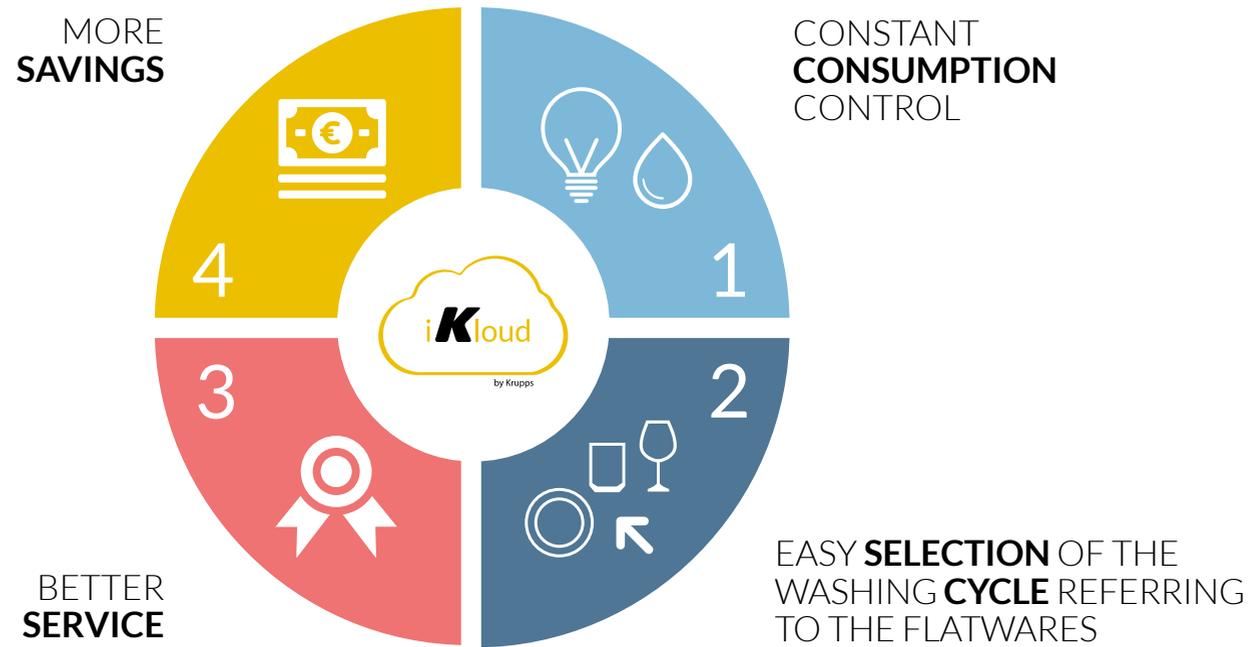

Thanks to the **real-time notification service** the engineer is able to organise his daily interventions and manage at best its working day, gaining time for other maintenances.

06

IKLOUD, ONE IDEA, SEVERAL VALUES

iKloud well represents Krupps' technology given to its customers, to **increase your income** day by day.

07

THE DISHWASHER EVERYWHERE YOU WILL BE

The connection with **iKloud** gives the engineers the availability to check every installed machine and to set their parameters exactly as being in front of the dishwasher.
No more common assistances to modify temperatures and chemicals quantities, thanks to **iKloud** the engineer will have more time to manage its interventions, granting the customers a faster service.

UNIKO DISPLAY, A SIMPLE TOUCH VALUE

THE CONVENIENCE
BEFORE EVERYTHING!
CHOOSING THE FITTEST
WASHING CYCLE HAS
NEVER BEEN SO EASY.

With the newest **UNIKO** display checking the dishwashers' status and the development of the washing cycle becomes very easy.

The tempered glass avoids every water or steam infiltration, giving the best performances

The display is even more user-friendly, simple for every user. Every washing cycle consumptions will be shown both on the display and through the **iKloud** gate.

Choosing the fittest washing cycle becomes really easy, just click on the icon corresponding to the flatware's type charged on your basket and press play picking one of the presetted cycles, to obtain:

- ▶ a **soft cycle** for brilliant and flawless wine glasses;
- ▶ the ideal cycle for **beer's tankard**;
- ▶ **degreasing trays and sanitizing dishes**: nothing easier;
- ▶ an **intense cycle** that will remove efficaciously all the residues from the glasses;
- ▶ the **eco-friendly cycle par excellence**, with low consumptions for not such dirty flatwares.

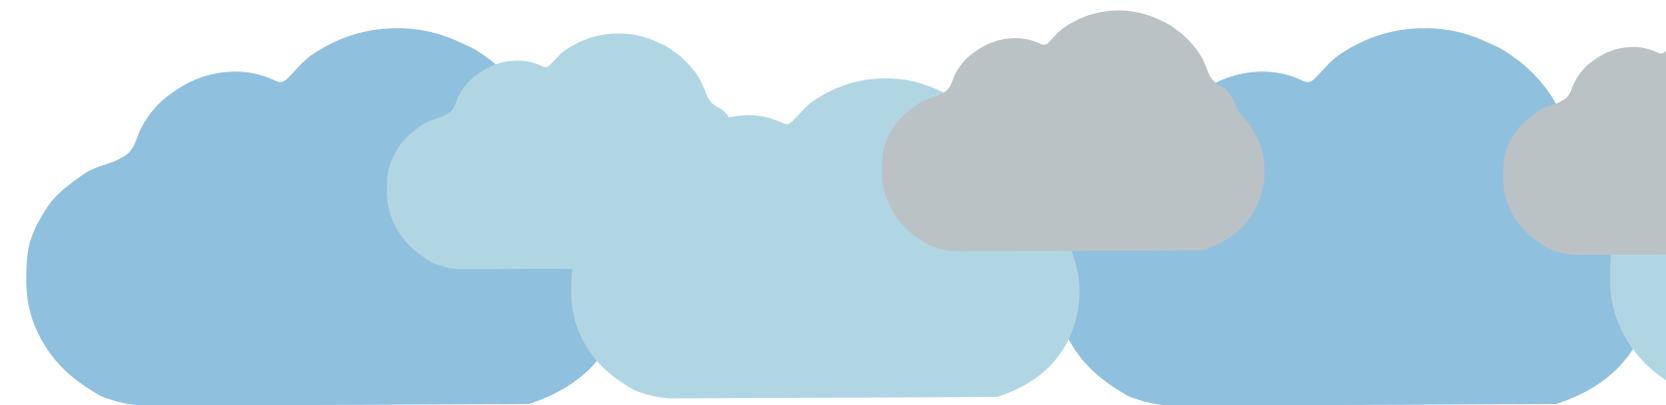

TAKE CARE OF YOUR CUSTOMER, **IKLOUD** DEALS WITH ALL THE REST
