The **CH100-BT** hood-type dishwasher is the right solution for establishments that have to wash different types of dishes, proving capable of washing glasses, dishes, medium-sized objects and GN 1/1 gastronorm trays in just a 620 mm width, ensuring a maximum productivity of 60 baskets/hour (1080 dishes/hour).

The hood-type models are fitted with an easily removable basket support for easy cleaning and a **rounded moulded tank with integral filters** for perfect draining and absolute hygiene. The “**PUSH TO START**” cycle start system ensures less waste, preventing the start of empty washes.

The dishwashers of the **ADVANCE line** with **Break Tank** guarantee maximum performance thanks to the **Acquatech System** installed as standard that, through an atmospheric boiler and a rinse pump, keeps constant temperature and pressure and optimal water consumption.

The **ADVANCE panel** is the real trump card of the line thanks to its 4 washing cycles and an automatic drain cycle (with drain pump installed). On the control panel you can easily view the tank and boiler temperature, the messages of the **self-diagnosis system**, the **Scheduled Maintenance warning** and the **intelligent Start button**, which changes colour to always show the status of the dishwasher with great simplicity. The simple and extremely effective electronic board gives you the possibility to set and control the rinse and discharge times, the wash and rinse temperatures and the relevant Thermostats, which are essential to guarantee an excellent washing result.

The **double electric detergent and electric rinse aid dispenser** installed as standard guarantees maximum hygiene in every wash cycle with great savings; the washing and rinsing impellers, on the other hand, ensure **reliability and durability**. The body is made entirely of **AISI 304 steel** and is designed with all components at the front for **easy servicing by the technician**. Sturdy and reliable dishwashers to **best deal with every moment of your day**.
