# ELITECH RANGE EL60TH

| TYPE | Pass-through dishwasher |
|---|---|
| LINE | ELITECH RANGE |
| BASKET | 500x500 |
| SIZE | 620x770x1552/2012h |

The dishwashers of the **ELITECH** line ensure maximum performance thanks to the standard Acquatech System which, through an atmospheric boiler and rinse pump, maintains constant temperature and pressure and optimum water consumption. **ELITECH** ensures a sanitising rinse cycle and proves to be the perfect choice for canteens, nursing homes, pastry shops, bakers and butchers where compliance with HACCP rules is essential. For those who seek glass perfection, it is possible to connect a Reverse Osmosis System which purifies water and reduces detergent and rinse-aid consumption, ensuring excellent results and perfect glasses without the need for hand drying. The innovative *UNIKO tempered glass touch screen display* makes any operation simple and intuitive, from the choice of most suitable wash cycle to its progress control, as well as constantly monitor the dishwasher state with ease. The large variety of wash cycles makes the dishwasher customisable according to your needs. Constant self-diagnosis allows you to minimise machine downtime, promptly warning the technician thanks to the Wi-Fi IKLOUD control system that gives the possibility to act remotely to change the dishwasher parameters and resolve the situation in real-time.

The **EL60TH hood type dishwasher** is the right solution for businesses that are faced with the washing of different types of dishes, proving capable of washing glasses, dishes, medium sized objects up to 500x500x390(h)mm and GN 1/1 baking trays in only 620 mm wide, ensuring a maximum productivity of 60 baskets/hour (1080 dishes/hour). Its practical control panel located at operator level is visible and easy to control, especially in corner installations. The hood type models are fitted with an easily removable basket support for easy cleaning and a rounded moulded tank with integral filters for perfect draining and absolute hygiene. The "**PUSH TO START**" cycle start system ensures less waste preventing the start of empty washes. The Reverse Osmosis System, the suitable detergents and the tilted basket make the **EL60E** model excellent for treating your glasses gently.

The electronic control allows you to manage various parameters to give you an absolute customisation level and the continuous self-diagnosis allows you to minimise machine downtime, suggesting some operations to be verified. The self-cleaning cycle at the end of the day cleans the wash tank and empties the boiler from the hot water, preventing limestone forming inside. The bodywork is made entirely of **AISI 304** steel and has been designed with all components in the front to allow easy technical assistance.

**EN IEC 63136 COMPLIANT MODEL**
